

PPE-Violation-Detection-Dataset Guide

Author : Sugandh Gupta

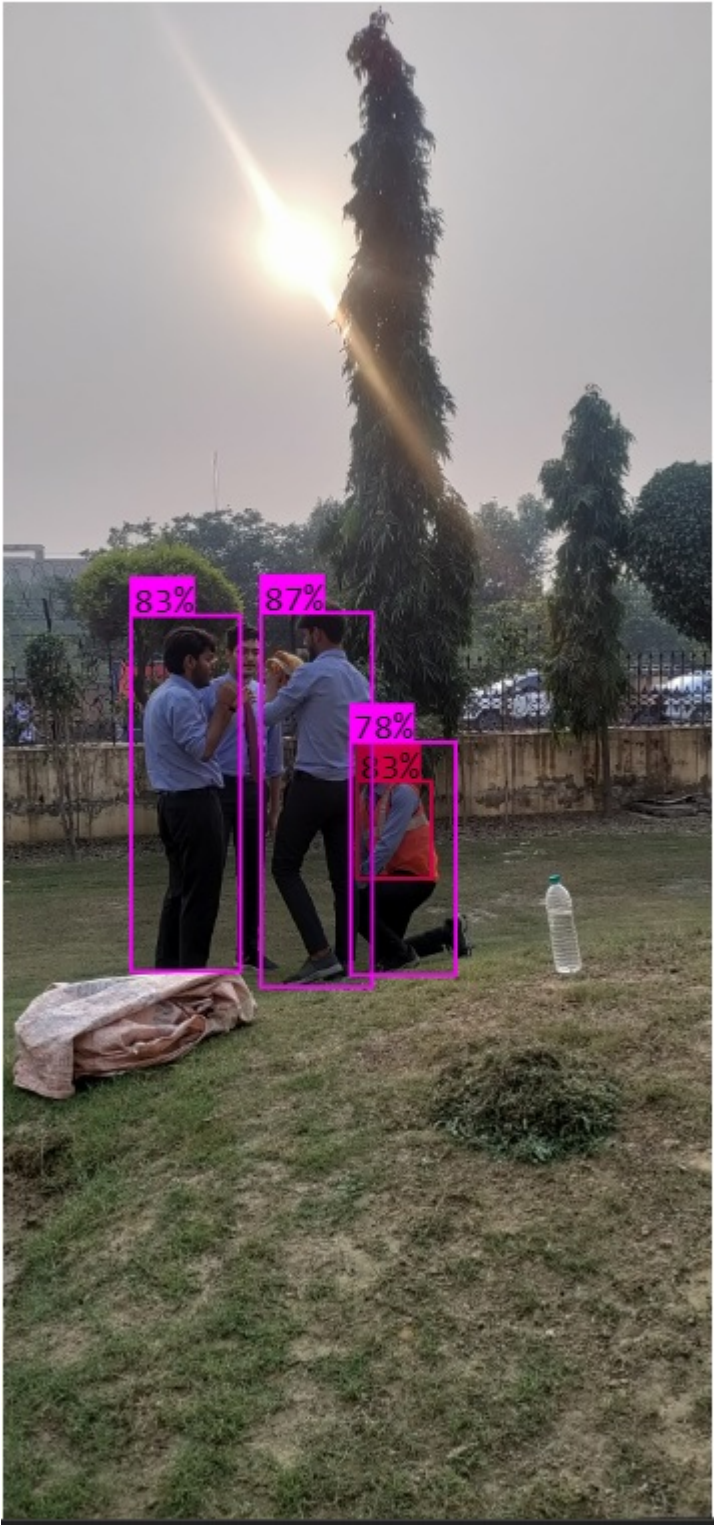

KeyPoints to make Dataset

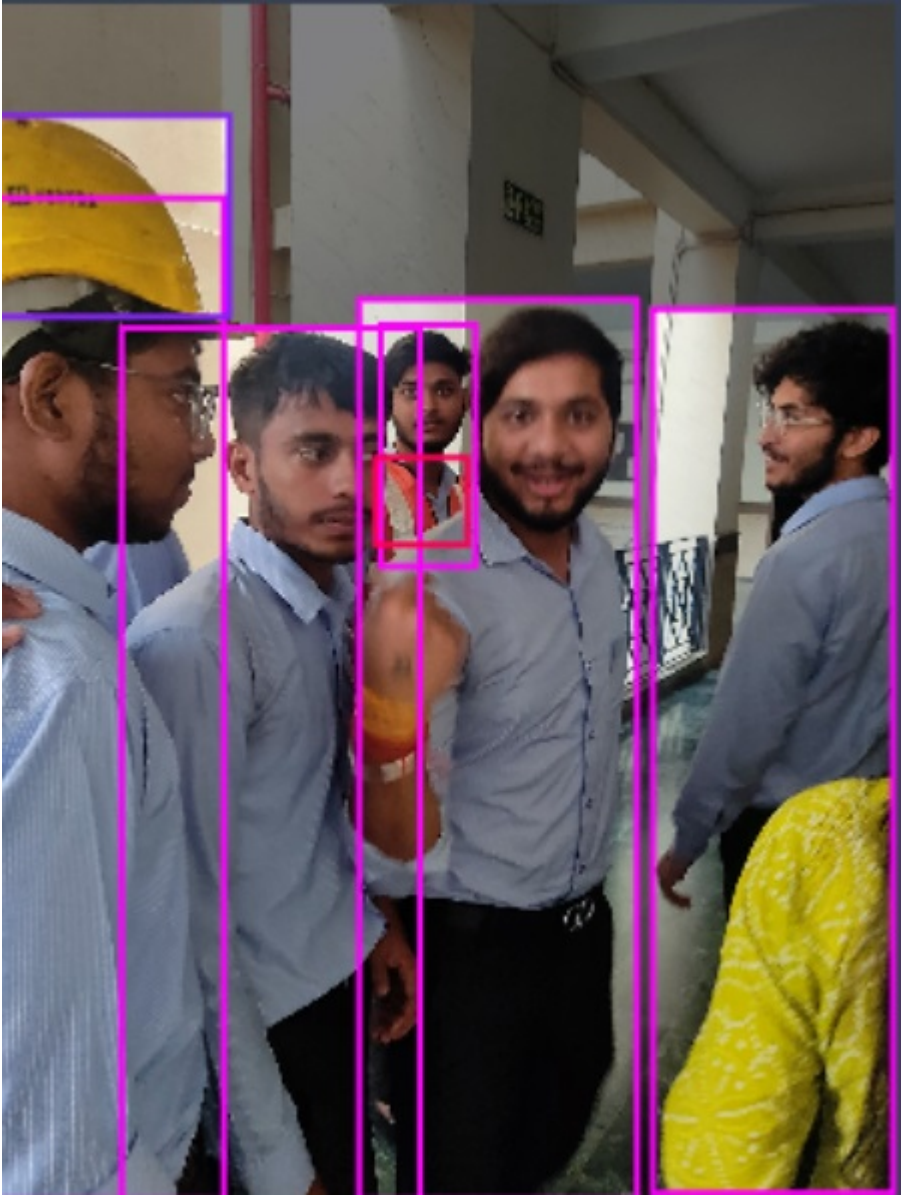

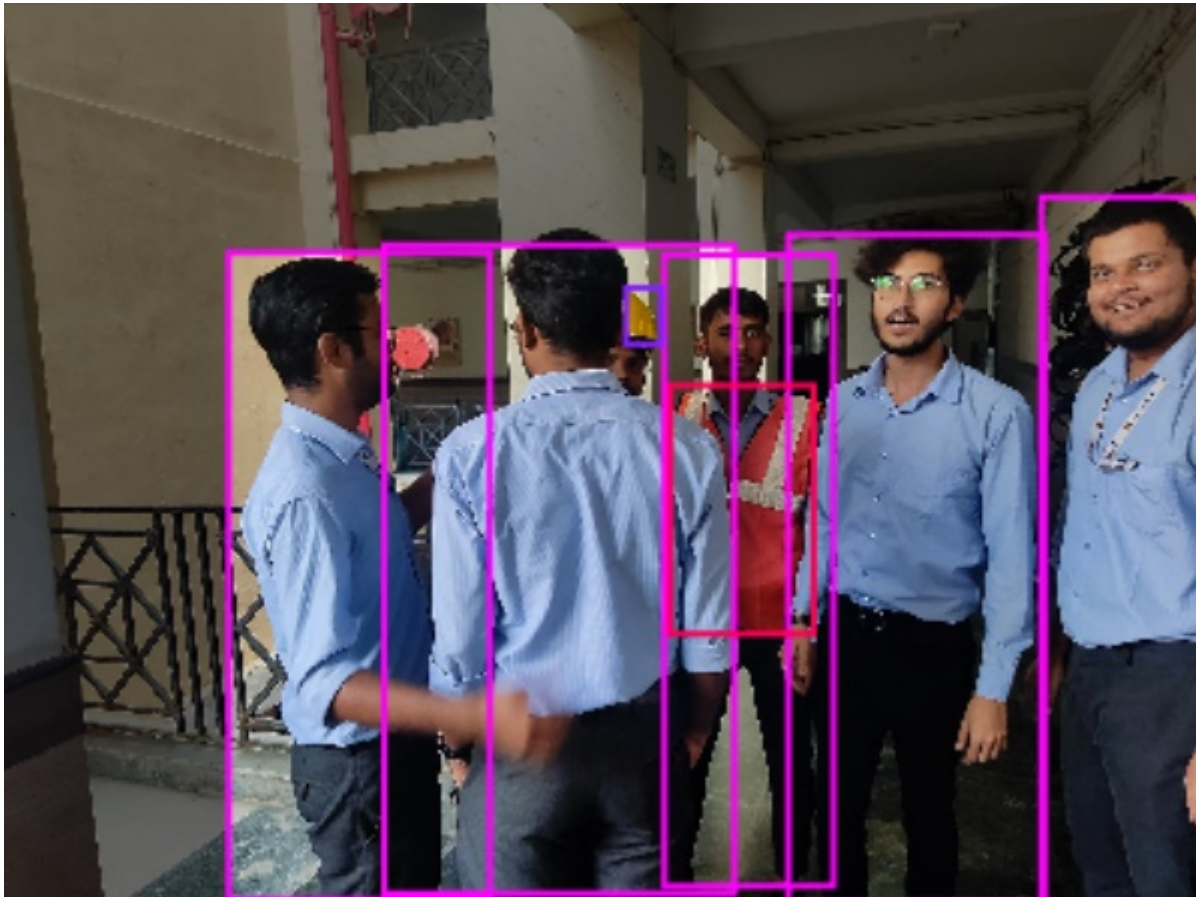

Points to Remember

1. Dataset should be clear and should be taken from a proper distance.
2. Diverse set of images are to be collected with different colors of jackets and helmets.
3. Balance between all the classes - safe, unsafe, without helmet, without jacket, should be maintained
4. Random image clicks has to be avoided

Bad Dataset

Good Dataset
